OBJECTIVE

Full Stack Developer (MERN) with hands-on experience building scalable web applications and REST APIs. Strong foundation in Data Structures (250+ problems solved). **Seeking a Software Developer role** to build efficient, scalable, and user-focused applications.

EXPERIENCE

- **The Skybrisk [Certificate]** Nov 2025 - Feb 2026
React Developer Intern India
 - Built and deployed responsive web applications using **React, HTML, CSS, and JavaScript**, and improved **UI performance by 30%** through component optimization and efficient state management.
 - **Designed and developed a personal portfolio website** using **reusable React components**, improving **code maintainability** and reducing development time.
 - Used Git and GitHub for version control, **ensuring smooth collaboration** and reducing **code conflicts**.
 - Completed a 3-month internship, delivering multiple frontend projects within deadlines and gaining **real-world development experience**.
- **Bharat Intern [Certificate]** Sep 2023 - Oct 2023
Web Development Intern Remote
 - Built multiple frontend projects including a **Netflix UI Clone**, and Temperature Converter.
 - **Improved UI responsiveness** and **user experience** using modern CSS and layout techniques.
 - **Successfully completed all assigned tasks within deadlines**, demonstrating **strong time management** and execution skills.

EDUCATION

- **Veer Madho Singh Bhandari Uttarakhand Technical University** Sep 2022 – Jun 2026
Bachelor of Technology (B.Tech) in Computer Science & Engineering Dehradun, India
 - **Current GPA:** 7.01 / 10.00 (till 6th Semester)
 - **Key Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Development
- **Government Inter College Niranjanpur** 2022
Higher Secondary Education (Class XII) – UBSE/State Board [Haridwar, India]
 - **Percentage:** 70%
 - **Core Subjects:** Physics, Chemistry, Mathematics
- **Government Inter College Niranjanpur** 2020
Secondary Education (Class X) – UBSE/State Board [Haridwar, India]
 - **Percentage:** 83.2%

PROJECTS

- **Portfolio Website (Highlight Project)** May 2024 - July 2024
Tools: React, Tailwind CSS, JavaScript, GitHub Pages [Live]
 - **Engineered a high-performance portfolio** using **React and Tailwind CSS**, implementing **modular component architecture** to showcase technical proficiencies.
 - **Developed reusable UI components** and optimized **State Management**, significantly improving code maintainability and reducing development overhead.
 - **Integrated a custom resume comparison algorithm**, enhancing application logic and interactive user engagement.

- **Optimized frontend delivery** and cross-device responsiveness, ensuring seamless UX across various viewports. [Github](#)
- **ClayOra – Full Stack E-commerce Platform (Highlight Project)** June 2025 - Present
Tools: React.js, Node.js, Express.js, MongoDB, JWT, REST APIs [\[Live\]](#)
 - **Architected a full-stack MERN application** featuring complex product management, dynamic cart systems, and secure order processing workflows.
 - **Implemented secure Authentication and Authorization** using **JWT (JSON Web Tokens)** with **Role-Based Access Control (RBAC)** for Admin, Seller, and User profiles.
 - **Designed and developed RESTful APIs** using **Express.js** for scalable backend operations and structured JSON data handling.
 - **Optimized MongoDB NoSQL schema and indexing**, reducing database query latency and improving overall API response times.
 - **Built responsive UI modules** with enhanced usability, utilizing **asynchronous data fetching** for a seamless customer experience. [GitHub](#)
- **Carbon Footprint Tracker (Ongoing)** Sep 2025 - Present
Tools: React Native, Node.js, MongoDB, Google Maps API
 - **Developing a cross-platform mobile application** using **React Native** to track and visualize carbon footprints for individuals and communities.
 - **Integrating external RESTful APIs** for real-time analysis of transport and energy consumption metrics.
 - **Designing scalable backend services** with **Node.js** and **MongoDB** for high-concurrency data processing and visualization.
 - **Leveraging Climate-Tech innovations** to implement predictive modeling and promote eco-friendly sustainability practices.
- **Smart Traffic Light Management System (Highlight Project)** 2025 - Present
Tools: Python, SUMO, Simulation
 - **Developed an intelligent traffic optimization system** utilizing **Python** and **SUMO simulation** for real-time intersection control.
 - **Implemented Adaptive Signal Control algorithms**, effectively reducing traffic congestion and improving overall intersection throughput.
 - **Executed simulation of real-world traffic scenarios** to perform data-driven performance analysis and optimize decision-making logic.
 - **Applied Green Wave synchronization concept**, significantly reducing vehicle idle time and improving traffic flow efficiency. [GitHub](#)

SKILLS

- **Languages:** Java, JavaScript, Python, C
- **Frontend:** React.js, HTML, CSS, Tailwind CSS, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs
- **Databases:** MongoDB, MySQL
- **Research/Thesis:** Smart Traffic Management (Ongoing 2025), Carbon Footprint Tracking, Predictive Modeling, Adaptive Signal Control
- **Tools:** Git, GitHub, Postman, VS Code, Jupyter Notebook, SUMO Simulation
- **Core Concepts:** Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Predictive Analytics

CODING PROFILES

- **DSA Solved 250+ problems on LeetCode, GeeksforGeeks, and InterviewBit.** Strong understanding of data structures, **algorithms**, and problem-solving patterns.
